

2d. Geographical Skills including Fieldwork

Geographical skills are fundamental to the study and practice of geography. They are integrated into all aspects of the subject. The skills listed on the following pages provide a basis for further study and research across a range of subjects as well as being core skills for the world of work. Learning these skills in the context of the specification covering the eight topics from components (01) and (02) will stimulate learners to 'think geographically'. It will also provide

them with opportunities to apply the skills in a wide range of curriculum or learning contexts.

Learners will be able to apply the skills listed on the following page in familiar and novel contexts. Teaching and learning should embed and contextualise the listed geographical skills into the content of Our Natural World (01) and People and Society (02).
