

10.03	Area calculations				
10.03a	Area of a triangle	Know and apply the formula: $\text{area} = \frac{1}{2} \text{ base} \times \text{height}.$		Know and apply the formula: $\text{area} = \frac{1}{2} ab \sin C.$	G16, G23
10.03b	Area of a parallelogram	Know and apply the formula: $\text{area} = \text{base} \times \text{height}.$ [Includes area of a rectangle]			G16
10.03c	Area of a trapezium	Calculate the area of a trapezium.			G16
10.03d	Area of a circle	Know and apply the formula $\text{area} = \pi r^2$ to calculate the area of a circle.	Calculate the area of a sector of a circle given its angle and radius.		G17, G18
10.03e	Area of composite shapes	Apply area formulae in calculations involving the area of composite 2D shapes.			G17, G18
