

2e. Content of non-exam assessment content - Creating media (03/04)

Creating media (Component 03/04) is a non-exam assessment component that gives learners the opportunity to apply their knowledge and understanding of media to the research, planning and creation of a practical production piece.

Learners create a media product in response to briefs set by OCR. Creating media (Component 03/04) allows learners to create media products for an intended audience, by applying knowledge and understanding of the theoretical framework of media to communicate meaning (AO3). More specifically, learners must:

- Create media products for an intended audience, by applying knowledge and understanding of the theoretical framework of media to communicate meaning.

Learners must develop their knowledge and understanding of the following areas of the theoretical framework, applying them to their own media production:

- **media language:** how the media communicate meanings through their forms, codes and conventions

- have the ability to use media language to create their own independent media productions for an intended audience
- have research, planning and production skills through the creation of their own independent media production which is clearly aimed at an intended audience.

Learners must work independently to research, plan and produce **one** individual media production in response to an OCR set brief from any one of the four following media forms:

- Magazines
- Television
- Music Video
- Online.

Learners will bring the knowledge and understanding gained from studying the theoretical framework and media products in Components 01 and 02 to this component. These studies will form the basis of the realisation of their media product for Component 03/04.
