

2.2 Sports psychology

Learners will develop their knowledge and understanding of the psychological factors that can affect performers. They will also develop their knowledge and understanding of how movement skills are learned and performed in physical activities and sports.

The characteristics and classification of skilful movement will be understood, along with the role of goal setting and mental preparation to improve performance in physical activities and sports.

Learners will develop their knowledge and understanding of guidance and feedback that affects the learning and performance of movement skills.

Learners will be able to identify key terms and describe psychological concepts, using practical examples from their own performances. Learners will show that they can explain and evaluate sports psychology theories and principles and be able to apply theory to practice.

Topic area	Learners must:
Characteristics of skilful movement 	- know the definition of motor skills - understand and be able to apply examples of the characteristics of skilful movement: - efficiency - pre-determined - co-ordinated - fluent - aesthetic.
Classification of skills 	- know continua used in the classification of skills, including: - simple to complex skills (difficulty continuum) - open to closed skills (environmental continuum) - be able to apply practical examples of skills for each continuum along with justification of their placement on both continua.
Goal setting  	- understand and be able to apply examples of the use of goal setting: - for exercise/training adherence - to motivate performers - to improve and/or optimise performance - understand the SMART principle of goal setting with practical examples (Specific, Measurable, Achievable, Recorded, Timed) - be able to apply the SMART principle to improve and/or optimise performance.
Mental preparation 	- know mental preparation techniques and be able to apply practical examples to their use: - imagery - mental rehearsal - selective attention - positive thinking.

Topic area	Learners must:
Types of guidance 	• understand types of guidance, their advantages and disadvantages, and be able to apply practical examples to their use: ○ visual ○ verbal ○ manual ○ mechanical.
Types of feedback 	• understand types of feedback and be able to apply practical examples to their use: ○ intrinsic ○ extrinsic ○ knowledge of performance ○ knowledge of results ○ positive ○ negative.
