

1.5 Practical investigation	1.5.1 One practical research exercise to gather data relevant to topics covered in social psychology. This practical research exercise must adhere to ethical principles in both content and intention.
	In conducting the practical research exercise, students must: • design and conduct a questionnaire to gather both qualitative and quantitative data to look for a difference in the data • consider questionnaire construction, sampling decisions and ethical issues • collect and present an analysis of quantitative data using measures of central tendency, measures of dispersion, (including range and standard deviation as appropriate), bar graph and frequency table • collect and present an analysis of qualitative data using thematic analysis • consider strengths and weaknesses of the questionnaire and possible improvements • write up the procedure, results and discussion section of a report.
	Suitable examples • A questionnaire to see if males or females perceive themselves to be more obedient. • An investigation into in-group favouritism.
