

6.5 Practical investigation	6.5.1 One practical research exercise to gather data relevant to topics covered in criminological psychology. The practical research exercise must adhere to ethical principles in both content and intention.
	In conducting the practical research exercise, students must: • conduct a questionnaire, interview or an experiment • gather qualitative and/or quantitative data but must involve quantitative data for analysis (can turn qualitative data into quantitative data for analysis purposes) • include inferential statistical testing as appropriate such as chi squared, Mann-Whitney U, Wilcoxon or Spearman's rho • include research question/hypothesis; research method; sampling; ethical considerations; data collection tools; data analysis; results; discussion • consider strengths and weaknesses of the practical research exercise and possible improvements.
	Suitable examples • An experiment into the use of cognitive interview concerning recall of a specific event. • View a crime/courtroom drama and conduct an interview/questionnaire on participants about the reasons why the defendants may have committed the crime they are accused of.
