

Topic 1: Computational thinking

Students are expected to develop a set of computational thinking skills that enable them to design, implement and analyse algorithms for solving problems.

Students are expected to be familiar with and use the Programming Language Subset (PLS) document provided on the [GCSE in Computer Science section of our website](#).

The flowchart symbols students are expected to be familiar with and use are shown in *Appendix 2*.

Subject content	Students should:
1.1 Decomposition and abstraction	1.1.1 understand the benefit of using decomposition and abstraction to model aspects of the real world and analyse, understand and solve problems
	1.1.2 understand the benefits of using subprograms
