

1.10 The categorisation of the types, properties and structure of thermoforming and thermosetting polymers	To apply knowledge and understanding of working properties, characteristics, applications, advantages and disadvantages of the following types of materials, in order to be able to discriminate between them and select appropriately.
	1.10.1 Thermoforming polymers, including: - a acrylic - b high impact polystyrene (HIPS) - c biodegradable polymers – Biopol®.
	1.10.2 Thermosetting polymers, including: - a polyester resin - b urea formaldehyde.
	1.10.3 Properties, including: - a insulator of heat - b insulator of electricity - c toughness.
