

3.4 The impact of forces and stresses on papers and boards and how they can be reinforced and stiffened	An awareness of the influence of forces and stresses that act on materials and the methods that can be employed to resist them.
	3.4.1 Forces and stresses: - a bending - b torsion - c shear - d compression.
	3.4.2 Reinforcement/stiffening techniques: - a laminating - b encapsulation - c corrugation - d additions of layers and ribs - e sandwich construction - f packaging laminates.
