

Topic 2: Memory – How does your memory work?

Subject content	What students need to learn:
2.1 Memory	2.1.1 Know the structure and process of memory and information processing: a. input b. processing c. output d. encoding e. storage f. retrieval
	2.1.2 Understand the features of short-term and long-term memory, including: a. duration b. capacity
	2.1.3 Understand retrograde and anterograde amnesia, including: a. the term 'retrograde amnesia' b. the term 'anterograde amnesia' c. the symptoms of retrograde amnesia d. the symptoms of anterograde amnesia
	2.1.4 Understand the active process of memory through the Theory of Reconstructive Memory (Bartlett, 1932), including strengths and weaknesses of the theory: a. how schemas are formed b. how schemas influence memory
	2.1.5 Understand the structure and process of memory through the Multi-store Model of Memory (Atkinson and Shiffrin, 1968), including strengths and weaknesses of the theory: a. sensory register b. the capacity of short-term memory c. the duration of short-term memory d. the capacity of long-term memory e. the duration of long-term memory f. role of attention in memory g. role of rehearsal in memory
